

**THE PROJECT FOR UPGRADING QUALITY OF HEALTH SERVICE OF KAMPONG
CHAM PROVINCIAL HOSPITAL
OF
MINISTRY OF HEALTH**

PROJECT DESCRIPTION

1. Introduction

1. The Ministry of Health (MoH) has high responsible implementing on integration approach of health service provision include prevention service, health education, diagnosis, treatment and maintain and rehabilitation via providing quality, safety and efficiency service. Health service system basically focused on service provision or public health intervention which relating on resident health and impact of society on health as well. Those service provisions are aimed to reduce disease and death of mother, baby and children, and reduce the infectious and non-infectious diseases and public health issue. MoH has planned on Upgrading Quality of Health Service of Kampong Cham Provincial Hospital in the purpose of serving a better health care service for general population in the region.

2. The proposed project for Upgrading Quality of Health Service of Kampong Cham Provincial Hospital is consisting of renovation and removing of existing building, and construct new building. Current internal medical ICU and the former surgery block will be replaced by advanced medical services block and general medical services block, respectively. Moreover, the mortuary building and wastewater treatment plant are also supposed to be constructed for this proposed project. The project has several concepts to be improved including provide the best quality medical service, tertiary health with accurate diagnosis and more effective and efficiency treatment for local people, and new medical technologies in the regions. The improvement of advanced medical services is to strengthen healthcare by establishment of training system on the utilizing of advanced technologies. This strengthening of health sector has been supported by Japan International Cooperation Agency (JICA) accordance to requesting by Cambodian Government.

2. Kampong Cham Provincial Hospital

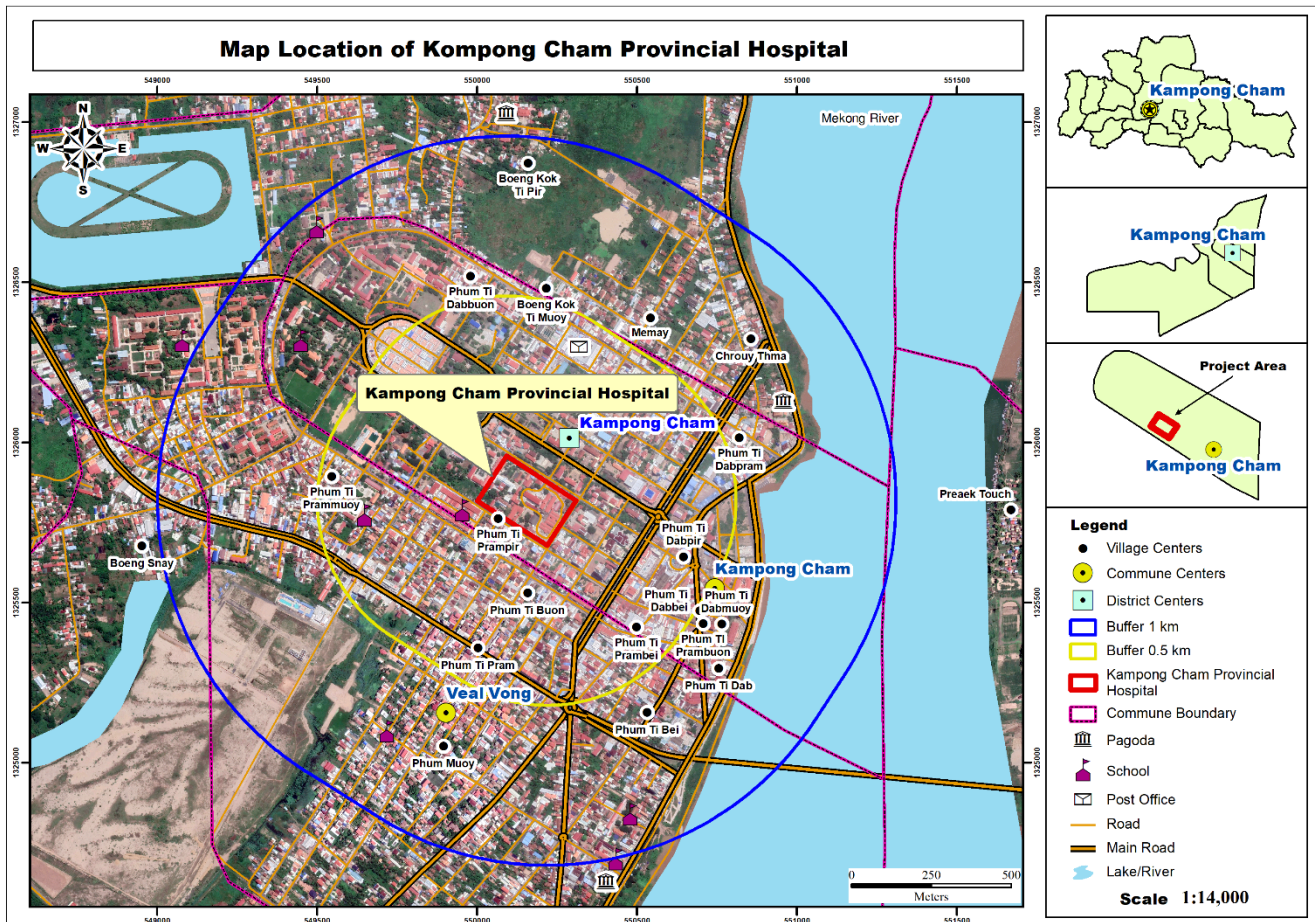

3. Kampong Cham Provincial Hospital was built in 1930 during French colonial period. There are 6 building for first construction and after that some old building was demolished and constructed the new

building instead. Up to 2020, some old buildings have not been renovated yet which it is still operated as the consultation building. Currently, the Ministry of Health (MoH) aimed to promote the quality of health service of Kampong Cham Provincial Hospital. Thus, Japan International Cooperation Agency (JICA) has supported accordance to requesting by Cambodian Government to strengthen and improve the health sector by demolishing and renovating the existing facilities and construct new building.
