

**THE PROJECT FOR UPGRADING QUALITY OF HEALTH SERVICE OF KAMPONG  
CHAM PROVINCIAL HOSPITAL  
OF  
MINISTRY OF HEALTH**

---

**PROJECT DESCRIPTION**

---

**1. Introduction**

1. The Ministry of Health (MoH) has high responsible implementing on integration approach of health service provision include prevention service, health education, diagnosis, treatment and maintain and rehabilitation via providing quality, safety and efficiency service. Health service system basically focused on service provision or public health intervention which relating on resident health and impact of society on health as well. Those service provisions are aimed to reduce disease and death of mother, baby and children, and reduce the infectious and non-infectious diseases and public health issue. MoH has planned on Upgrading Quality of Health Service of Kampong Cham Provincial Hospital in the purpose of serving a better health care service for general population in the region.

2. The proposed project for Upgrading Quality of Health Service of Kampong Cham Provincial Hospital is consist of removing of existing building and construct new building. Additionally, new facilities are planned to be constructed including advance medical service block, general medical service block, mortuary and septic tank. The project has several concepts to be improved including provide the best quality medical service, tertiary health with accurate diagnosis and more effective and efficiency treatment for local people, and new medical technologies in the regions. The improvement of advanced medical services is to strengthen healthcare by establishment of training system on the utilizing of advanced technologies. This strengthening of health sector has been obtained the financial loan from Japan International Cooperation Agency (JICA) accordance to requesting of the Cambodian Government.

**2. Kampong Cham Provincial Hospital**

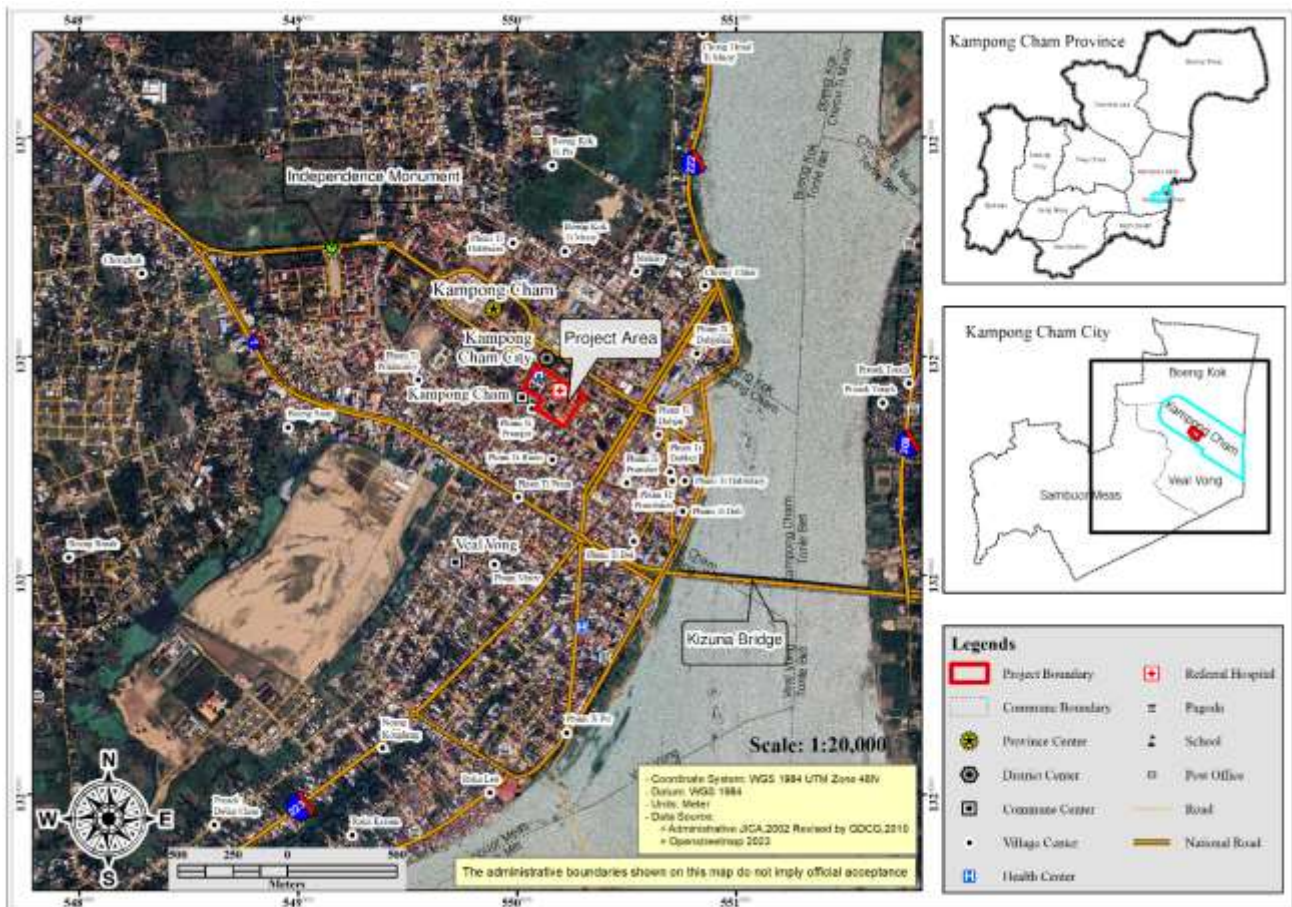

3. Kampong Cham Provincial Hospital was built in 1930 during French colonial period. There are 6 building for first construction and after that some old building was demolished and constructed the new building instead. Up to 2020, some old buildings have not been renovating yet which it is still operated

as the consultation building. Currently, the Ministry of Health (MoH) aimed to promote the quality of health service of Kampong Cham Provincial Hospital. Thus, Japan International Cooperation Agency (JICA) has supported as financial loan accordance to requesting of the Cambodian Government to strengthen and improve the health sector by demolishing the existing facilities and construct new building.
